

LANKA METRO TRANSIT (PVT) LTD

Sri Lanka Launches Smart Metro Digital Platform POC and Live Bus Display Board Hardware Integration POC

The Ministry of Transport, Highway, and Urban Development is pleased to announce the launch of the initial operational phase of the **Metro Bus Digital Platform (MBDP) and Bus Stop Display Board** initiative.

As part of this initiative, a pilot deployment covering **ten (10) buses** will be implemented in April 2026.

Pilot Routes: Makubura – Kadawatha / Makubura – Pettah

Key features of the Metro Digital Platform POC include:

- Real-time fleet monitoring
- Tap-in Tap-out digital payment system
- Centralized transport management dashboard
- Passenger information integration
- Digital reporting and operational visibility

The Bus Display Board POC enables:

- Real-time route information display
- Arrival and departure updates
- Destination visibility for passengers
- Enhanced commuter confidence

The LMT hereby invites interested companies to submit proposals to conduct a **Proof of Concept (POC) implementation** for the above-mentioned pilot deployment.

For further details regarding the submission requirements and proposal submission, please contact us via the email address below.

The deadline for submitting proposals is Friday, 6th March 2026.
